QUANTUM ARCHITECT · Electron Configuration Practice

Instructions: Answer each item in the space provided. Use the notation discussed in class. Show your work for any orbital diagram.

Name _____	Grade _____ Section _____	Date: November 07, 2026	Score: ____ / 60	Items: 12

#	Question	Answer space	Marks
1	Write the full electron configuration of Arsenic, As (Z = 33).	_____ _____ _____ _____	5
2	Write the noble-gas (shorthand) electron configuration of Selenium, Se (Z = 34).	_____ _____	5
3	Draw the orbital diagram (boxes with ↑ and ↓ arrows) for Cobalt, Co (Z = 27).	_____ _____ _____ _____ _____ _____	5
4	Identify the element described by this configuration: $1s^2\ 2s^2\ 2p^6\ 3s^2\ 3p^6\ 4s^1$ Give its symbol, name and atomic number.	_____ _____	5

#	Question	Answer space	Marks
5	Write the full electron configuration of Manganese, Mn (Z = 25).	_____ _____ _____ _____	5
6	Write the noble-gas (shorthand) electron configuration of Vanadium, V (Z = 23).	_____ _____	5
7	Draw the orbital diagram (boxes with ↑ and ↓ arrows) for Sodium, Na (Z = 11).	_____ _____ _____ _____ _____ _____	5
8	Identify the element described by this configuration: $1s^1$ Give its symbol, name and atomic number.	_____ _____	5

#	Question	Answer space	Marks
9	Write the full electron configuration of Neon, Ne (Z = 10).	_____ _____ _____ _____	5
10	Write the noble-gas (shorthand) electron configuration of Sulfur, S (Z = 16).	_____ _____	5
11	Draw the orbital diagram (boxes with ↑ and ↓ arrows) for Lithium, Li (Z = 3).	_____ _____ _____ _____ _____ _____	5
12	Identify the element described by this configuration: $1s^2\ 2s^2\ 2p^6\ 3s^2\ 3p^6$ Give its symbol, name and atomic number.	_____ _____	5
